

# D2.2. Mountain Adapt-emy Programme

**MOUNT  
RESILIENCE**

**Co-funded by  
the European Union**

Co-funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or CINEA. Neither the European Union nor CINEA can be held responsible for them.

Swiss partners have received funding from the Swiss State Secretariat for Education, Research and Innovation (SERI).

# Executive summary

Deliverable D2.2 provides an initial overview of the training needs identified by MountResilience demonstrator and replicator partners, that will guide the development of the Mountain Adapt-emy Programme, focused on enhancing resilience in mountainous regions and capacity-building for MountResilience demonstrators and replicators. It encompasses the results and insights from two key surveys: the Training Needs Survey and the Training Capacity Survey. These surveys identified specific training needs and expertise gaps within the demonstrator and replicator regions and the training capacities within the Consortium to meet those needs. The deliverable also outlines a series of potential training sessions derived from the survey results, covering topics such as vulnerability assessment, adaptation planning, equitable policy frameworks, financial tools, and sustainable business models. Overall, the Mountain Adapt-emy Programme aims to support demonstrator and replicator regions in achieving climate resilience through a targeted capacity-building programme. This is the first version of the Mountain Adapt-emy Programme, which will be updated along the project period, in order to reflect the project evolution and the partners' needs.
